ENVIRONMENT

The Group is committed to environmental protection and sustainability. We strive to minimise our properties' operational impact on the environment through resource conservation and best practices.

In delivering this commitment, our goals are to:

- Educate and inspire our guests and associates to conserve and preserve.
- Work diligently to minimise our waste stream and conserve natural resources, particularly through energy and water conservation, minimise usage of single-use plastics and recycle waste.
- Address environmental challenges through energy and water conservation best practices.
- Value the natural and cultural heritage of our properties, allowing us to give our guests an authentically local experience.
- Comply with all applicable environmental legislation and strive to follow best environmental practices.
- Make environmental considerations an important aspect of decision-making.
- Consider the opinions and feedback of our guests when examining our environmental programs and procedures.

** Targets:

- To continue exploring energy and water conservation practices to reduce energy and water consumption across the properties.
- Not to offer plastic straws, not to use single-use plastic stirrers, cutlery, cups, bowls and plates (unless guests specifically ask for them) at the restaurant, bar and rooms.
- Recycle waste to reduce total waste-to-landfill by sorting waste into recyclables and non-recyclables.

Environmental Sustainability:

Responsible management of natural resources in our hotel operations is a part of our business. With the changing climate and increased stresses on natural capital and resources, an ever-growing number of guests, associates and stakeholders want to be informed about and engaged in our efforts to operate our hotel more sustainably.

Energy

We work to reduce energy intensity at our hotel through identifying and implementing best practices at the property level; besides using energy efficient lighting and equipment, we are committed to making our properties as energy efficient as possible.

Examples of Energy Conservation Practices:

- Use low energy light bulbs, such as florescent and LED, wherever possible. These bulbs use up to 80 percent less energy than incandescent light bulbs.
- During room cleaning and turnover, open curtains whenever possible to let sunlight in the rooms during the cleaning work, so that a lamp should be lit only in dark areas, such as a bathroom.
- Keep windows closed and curtain drawn. The ingress of hot air during the summer and cold air during the winter contribute to significant waste of energy.
- Turn off room's lights, appliances, aircon, heaters, etc. when not physically occupied.
- Educate guests and staff to turn off lights and appliances when not in use in rooms and public areas.
- Front Desk staff book rooms in clusters, so that only occupied building areas or wings need to be heated or cooled. Rooms on top floors, at building corners, and facing west (in summer) or north (in winter) can be the most energy-intensive to heat or cool; therefore, consider renting them last.

- During lower occupancy period, try to block complete floor. If this is not practical, attempt should be made to block total wings of each floor.
- Lobby main entrance doors are not to be kept opened unduly. A door opening will result in ingress of hot air during the summer and cold air during the winter, thus contributing to significant waste of energy.

Water

In the pursuit of water conservation at our hotel, we have identified and implemented best practices to enhance the efficient use of water at the hotel we manage; besides using low-flow faucet and toilet fixtures, etc. to reduce water usage.

Examples of Water Conservation Practices:

- Ensure that staff are trained to know how to prevent excessive water usage while cleaning. For instance, they should know how many times they should flush the toilet, to mop rather than hose the floor, not to leave the taps running when carrying out cleaning.
- Use of low flow shower heads. These provide a good quality shower experience while using only 10 litres per minute.
- Use of low flow faucets. These typically have a maximum flow of 4 to 6 litres per minute.
- Use of low flow toilets. These toilets can use up to 80 percent less water than conventional toilets.
- Implementation of re-use of linen/towel program where guests are informed that we will not change linens or towels daily unless they request the service.
- Routinely check for leaks and fixing them in a timely manner.
- Pre-soaking utensils and dishes before washing.
- Wash vegetables and fruits in a sink of water rather than using running water to rinse.

Waste

We work to reduce waste intensity at our hotel through identifying and implementing best practices at the property level.

- a. We understand plastics accumulating in our oceans and on our beaches have become a global crisis. Billions of pounds of plastics can be found in swirling convergences that make up about 40 percent of the world's ocean surfaces. At current rates plastics are expected to outweigh all the fish in the sea by 2050.

In joining the global fight against plastics use, we have committed to the following as part of our continuous journey to undertake sustainable practices to reduce plastic waste:

- use dispensers for soaps and shampoos in bathrooms.
- not to offer plastic straws, not to use single-use plastic stirrers, cutlery, cups, bowls and plates (unless guests specifically ask for them) at the restaurant, bar and rooms.

- b. The rise in waste will reach 3.4 billion tons by 2050 from around 2 billion tons in 2016, with more than a third of waste globally ending up in landfill. A booming waste burden could also contribute to climate change impact, with the treatment and disposal of current waste levels generating around 5 percent of carbon emissions.

We have committed to the following as part of our continuous journey to undertake sustainable practices to manage waste to reduce total waste-to-landfill:

- having recycling bins in common and/or public areas
- sort waste into recyclables and non-recyclables

Guiding Principles:

- Friendly and courteous service assures guests that they can relax and enjoy their stay, and makes guests feel appreciated and encouraged to return.

Knowledgeable

To ensure continuous improvement in providing excellent service to our guests, we make it a point to connect with our guests on a personal level and pay close attention to our guest feedback and guest satisfaction data. We obtain feedback and satisfaction data from guests in numerous ways:

- feedback and satisfaction questionnaires
- email
- verbal communication

We are committed to treat all feedback as important to us and we shall analyse feedback, guest satisfaction data and other relevant data to guide future decisions at our property and consider the improvements we could make in the future based on these data; this is to enable us to make the best decisions and use our resources productively so as to show our guests that we genuinely value their inputs.
